EXECUTIVE SUMMARY

As depicted in the media article below, the global terror threat is expanding rapidly, graphically illustrating the control element of Iranian covert operations and close control of its Popular Mobilization Fronts and its support nexus with identical allied nation state organizations. This has pervaded the decades, advanced the hegemonic goal of the global Caliphate and the desires of their new global Axis Powers, Iran, Russia, China!

CONTEXT

The current threat reporting here involving the targeting of US citizens and equities across the globe has been disseminated by the US Government agencies, global news media and in a body of In Obscura raw threat reporting analysis products. The point here is none of this should be a sudden revelation to Christians or out Clergy. It is to be expected per prophetic intelligence. The competent Watchman is on point and provides threat warning and intelligence.ⁱⁱ Appropriately outside the walls into the human domain and inside, warning and then making hostile contact with attacking forces.

“So the watchman reported, saying, “He went up to them and is not coming back; and the driving is like the driving of Jehu the son of Nimshi, for he drives furiously!” (2 Kings 9:20, NKJV)

“Now a watchman stood on the tower in Jezreel, and he saw the company of Jehu as he came, and said, “I see a company of men.” And Joram said, “Get a horseman and send him to meet them, and let him say, ‘Is it peace?’” (2 Kings 9:17, NKJV)

There was usually a system whereby watchmen could report what they had spotted. They would pass on the “intel.” [2] And in the Bible, we read of some watchmen who had the ear of Kings! (2 Sam 18:25)

Therefore, given the now abundant awareness in His church, it is time for the Watchman to rise and assert their roles and be counted on to do as God has given lawful orders. There is no excuse for anything less, which in Ezekiel 3:17 there is a strict order and punishment for disobedience.

Much has unfortunately disseminated in American media concerning sleepers present in the country and its nexus to past border security and immigration legal and operational posture. This also mirrors the European posture during and especially following the Schengen Agreement of the European Unionⁱⁱⁱ, endorsed and continued by member states, which placed all border crossings closed and in abeyance. The effects of enemy exploitation and intelligence operations to neutralize nation security are in the media daily for years. The attacks are legendary. The church has sustained an extremely dramatic attack operational tempo in blood. It is time to stand. Key Takeaways have been outlined and published in In Obscura reports and analyses. This is Good Friday. Execute protective and biblical operations.

Paris (XVIth), April 2, 2026. Threats of destruction by explosive devices were aimed at the American bank Goldman Sachs. LP/Arnaud Journois

The spectre of an attack on an American bank still hangs over Paris this morning. On the night of Wednesday to Thursday, the Paris headquarters of the investment bank [Goldman Sachs](#), located at 85 avenue Marceau, in the 16th arrondissement, was placed under police surveillance after threats of destruction by explosive devices, attributed to an Iranian group.

It was 1:30 a.m. when the phone rang and broke the calm of the night. A security guard at the US bank's premises receives a call from its head of security, based in London. According to our information, the latter told him that she had received an email from the

American authorities, "advising her to be more vigilant" about the establishment. For good reason, "an Iranian group is threatening to attack buildings with explosive devices," says a source close to the case.

In the aftermath, local staff were sent to the site for a surveillance mission, and the magistrate on duty was notified. The case was referred to the police station of the 16th arrondissement. The Paris prosecutor's office said this Thursday morning that "no suspicious element was highlighted on the spot".

Already very tense context

This episode comes in a particularly tense context. Less than a week ago, on the night of March 27 to 28, [a bomb attack targeting the Paris headquarters of Bank of America](#), rue La Boétie (8th), was narrowly foiled. A 17-year-old teenager had been arrested when he had just planted an improvised explosive device in front of the establishment. The device, consisting of a five-liter canister of hydrocarbon coupled with a firing system, "could have generated a strong fireball several meters in diameter and spread a fire," according to the [National Anti-Terrorist Prosecutor's Office \(Pnat\)](#).

On Wednesday, April 1, a judicial investigation was opened for criminal terrorist association. Four suspects, among the [five placed in police custody](#), were indicted and imprisoned: a young adult and three teenagers aged 16 and 17, the latter from Montreuil (Seine-Saint-Denis).

The attempted attack "seems to be linked" to the pro-Iranian group "Harakat Ashab al-Yamin al-Islamiya" (Hayi), according to the PNAT, which specifies, however, that this link "could not be formally established at this stage". This small group has claimed responsibility for several attacks against the Jewish community in Belgium, the United Kingdom, and the Netherlands in recent days. The Minister of the Interior, Laurent Nuñez,
